## Blackfin 332CC

► **MANY ANGLERS RECALL BLACKFIN BOATS** from decades past, but this reinvented manufacturer is set to impress with the release of several exciting high-performance platforms, including the sleek 332CC. While combinations of immense size and power have set the new standard for center consoles, this nimble craft yields unique versatility and pleasure, leading friends, families and fishermen on unforgettable adventures.

Bearing a classic name within the fishing community and offering a revamped lineup of award-winning center consoles, Blackfin is back and better than ever. The flagship of the Blackfin line, the all-new 332CC, was recently granted a prestigious Innovation Award at the 2019 Miami International Boat Show highlighting impressive fishing features and family-pampering appointments.

While maintaining an open deck layout that lends itself to excellent offshore fishability, the 332CC is packed with high-end features and finish work. At the bow, two inserts in the coaming bolsters slip out to create forward-facing lounge seating, while ample space exists on the dual chase lounge forward of the console, with cavernous storage beneath. Additionally, bolstered three-wide console seats with integrated visibility step optimize comfort at the helm, while an extra-wide transom seat can be pulled out and put away with little effort.

Standing at the helm you'll find an engine monitoring system, dual 12v outlets with USB support, a power-assisted steering wheel and compass built into the digital engine monitoring system. With

comfort and convenience both points of emphasis regarding this design, one of the new features present is a side-entry console accessed via an innovative pantographic side door with articulating hinges that allows for ample room to access the console's interior and stow large items.

Innovation exists everywhere you look, and we are really fond of the rigging station with twin 45-quart slide-out YETI coolers, tackle drawers, cup holders, faucet and sink, built-in 20-gallon livewell and six rod holder launcher. A massive under gunnel rod locker exists on the starboard side, with smaller port and starboard under gunnel storage closer to aft. Four vertical rod holders line the transom, with six additional flush mount rod holders helping shape the perfect trolling spread.

Aesthetics are unparalleled, but performance is not to be overlooked with the stepped hull by Michael Peters Yacht Design comprising Core Rigid Technology generating a smooth, quiet and dry ride. With a re-invented design that improves on the legendary Blackfin platforms we all remember, this new 30-footer is quite a show stopper. **FSF**

### SPECS

L.O.A.....	33' 2"
Beam.....	10' 6"
Draft.....	23"
Fuel Capacity.....	315 gal.
Weight.....	10,500 lbs.
